

PLUMBER,
HEATING ENGINEER,
REFRIGERATION
TECHNICIAN...

VULCANE EXPRESS

NOTHING LESS THAN A
REVOLUTION!

A REVOLUTION IN POWER AND PERFORMANCE

With its **MAP//Pro** (Ref. 2400) cartridge, a heating temperature of 2,400°C (4352°F) and power output up to 3.5 kW (Ø 28 nozzle), the **VULCANE EXPRESS** uses its wrap-around **turbo flame** to **optimise heat distribution** round the circumference of the pipe being heated.

Its high efficiency and the absence of a false flame guarantee exceptional performance - down to the very last gram of gas !

A REVOLUTION IN ERGONOMICS!

Its light 400 gram weight and high comfort index rating make it **easy to handle**. The ergonomic bi-material handgrip and overall design efficiency give it its **unique style** : it looks really good!

A REVOLUTION IN PRACTICALITY

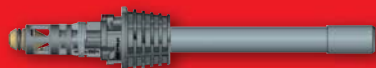

Rarely has a torch been given **so many features** by its designers. Capable of being used in all working conditions, **its detachable foot** gives the **VULCANE EXPRESS** user complete **flexibility** and also a **free-standing base** for when both hands are being used elsewhere !

Built-in piezo ignition, immediately reversible for working in all positions, patented self-maintenance system. When required, the Piezo and injector can be changed **without any tools whatsoever** and in just a few seconds.

Choice of 3 different burners specially designed to meet the requirements of air-conditioning and plumbing engineers :

For tube Ø14 mm - 0.55 in :
Refrigeration technician (Ref. 4714)

For tube Ø22 mm - 0.86 in :
Plumber (Ref. 4722)

For tube Ø28 mm - 1.10 in :
Heating engineer (Ref. 4728)

A REVOLUTION IN SIMPLICITY

Rarely has a product been so simple to use.

3-position control :

- 1/ Assembly/dismantling
- 2/ Locking
- 3/ Operating mode

With just one click of the **dual-mode ignition trigger**, operations can be switched from continuous to intermittent.

A REVOLUTION IN SAFETY

Particular attention has been given to user safety.

In addition to the **traditional guarantees given by the manufacturer** to all its products (cartridges, burners, injectors etc), **a special device** has been designed to block the trigger when the product is being stored or put on the shelf !

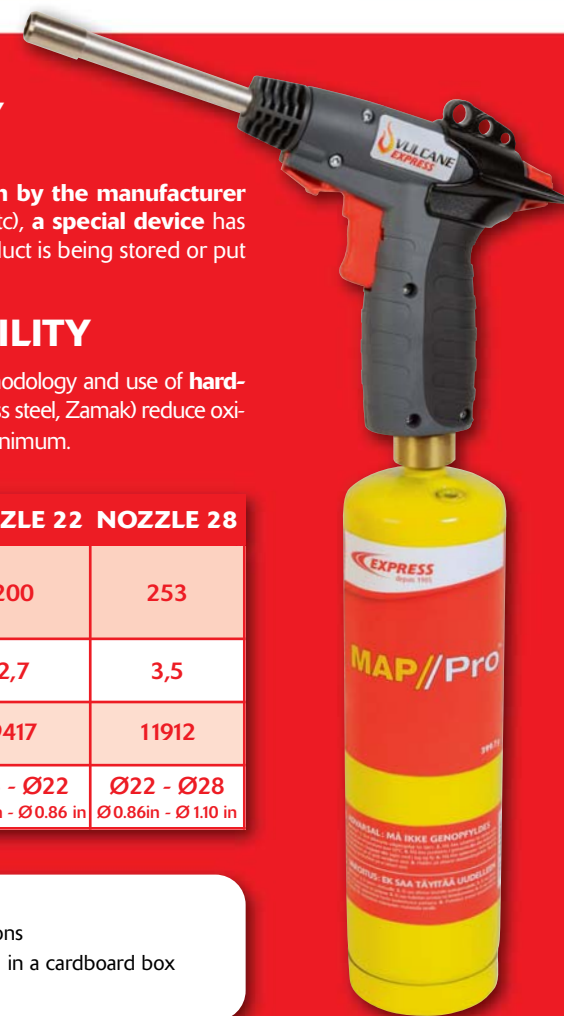

A REVOLUTION IN RELIABILITY

VULCANE EXPRESS is a tool whose design methodology and use of **hard-wearing superior quality materials** (Brass, Stainless steel, Zamac) reduce oxidation and causes of breakdowns to the absolute minimum.

	NOZZLE 14	NOZZLE 22	NOZZLE 28
GAS CONSUMPTION (g/h) according to NF EN 521 at 1.3 bar	153	200	253
POWER (kW) according to NF EN 521	2,1	2,7	3,5
BTU	7157	9417	11912
FOR TUBE	Ø10 - Ø16 Ø0.39in - Ø0.62 in	Ø16 - Ø22 Ø0.62in - Ø0.86 in	Ø22 - Ø28 Ø0.86in - Ø1.10 in

Specification Ref. 470

- 1 torch with burner Ref. 4722
- 1 Propylene cartridge Ref. 2400
- Stabiliser foot
- Instructions
- Supplied in a cardboard box
